Our Investment Approach

The **Social Arbitrage Fund** harnesses the power of diverse alternative data sources to identify trends in financial markets

We believe alternative data sources can be an early predictor of sales, earnings, and stock prices

Investment Process

Early Trend Detection

Consumer point-of-purchase data is often a trailing indicator

We monitor the consumer **pre-purchase journey**

We believe a mosaic of social, consumer, and corporate data is an **earlier** and **stronger** indicator of:

Fundamental company catalysts

Market rotations

Long-term macroeconomic trends

Sector trends

Risk Management

Traditionally estimated by historical price action and options implied volatility

We've found [social sentiment indicators](#) within our alternative data sources to be [even more informative](#) of future stock volatility

Assessing risk with this unique lens gives us a distinct edge

Portfolio Construction

We size positions according to the [opportunity signal strength](#) and risk

We exit positions when the trend is fading, typically indicated by our data or [saturation signals](#) from corporate filings, retail and institutional investors

Risk Management

We utilize a comprehensive options tail hedging strategy to [minimize idiosyncratic company risks](#)

We utilize index options, futures and short ETF positions to limit undesired market and sector risks

Trade Highlights

\$RL

Thesis:

- + Abnormal quarterly sales growth & alignment with consumer interests in luxury brands

What trends were we seeing:

- + Increase in organic category social interest, rising purchase and purchase intent, sector growth

Exit:

- + Slow down in sales growth seen in subsequent months and information saturation based on investor expectations post earnings

Risk Management:

- + Short duration call options with limited equity exposure

\$CELH

Thesis:

- + Long term social traction and consumer adoption, alignment with fitness trends

What trends were we seeing:

- + Substantial increases in product purchases and distribution, unique social adoption, discussion and influencer driven marketing / advertising strategies

Exit:

- + Limit in distribution expansion, thesis saturation in retail investor and public analyst coverage

Risk Management:

- + Continuous long term equity exposure combined market ETF hedges, sizing adjusted for product adoption growth, short duration call options for surprised earnings periods

\$LEVI

Trade story:

- + Levi's saw growing social traction after Beyoncé's "Cowboy Carter" album inspired a broad movement towards jeans and western-style clothing

Outcome:

- + Levi's Wholesale revenue for the quarter continued to drag on broader top-line figures, which couldn't meet high earnings expectations after a double-digit run up in the equity price.

Strategy Adjustments:

- + Developed a system to model hidden market expectations based on a combination of various metrics leading up to the earnings release date

\$LULU

Trade story:

- + Lululemon has benefited from broader trends in the athleisure market being an incumbent player that has continuously grown

Outcome:

- + Revenue growth was reflected in Lululemon earnings release; however, the share price was already priced for the reported level of growth and social adoption

Strategy Adjustments:

- + Integrate a deeper element of continuous company guidance tracking as a larger portion of the position holding and evaluation process
